PROFESSIONAL PROFILE

I am a junior back-end developer focused on building efficient, secure, and scalable solutions. I have experience in developing business logic, managing databases, and building APIs using technologies such as PHP, Laravel, Node.js, and JavaScript. I am motivated by optimizing system performance, continuously learning, and tackling new technological challenges, delivering value through clean, structured, and results-oriented code.

Skills

Technical Skills:

- Intermediate knowledge of electronics and computer systems
- Intermediate programming skills (O si prefieres destacar tu área: Intermediate software development skills)

Soft Skills:

- Proactive attitude and commitment
- Fast learner (Suena mucho más natural en inglés que "ease of learning")
- Team player o Teamwork
